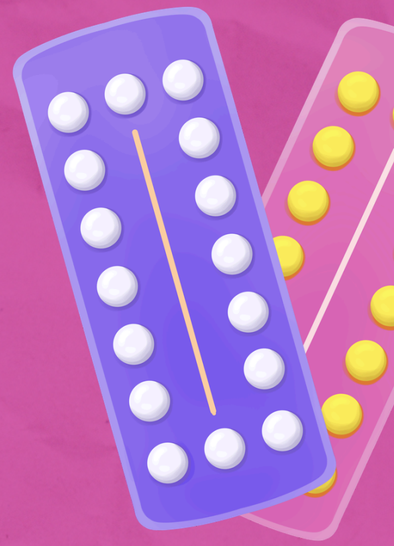
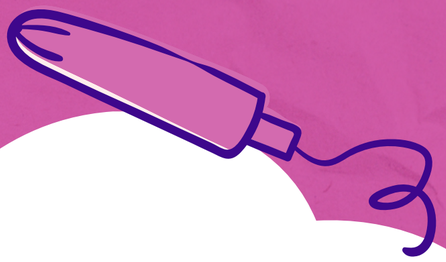
THE FOUNDERS

OUR TARGET COMMUNITY



We are targeting college-aged women who are considering birth control or are already on birth control and are taking or starting other medications.

WHY?

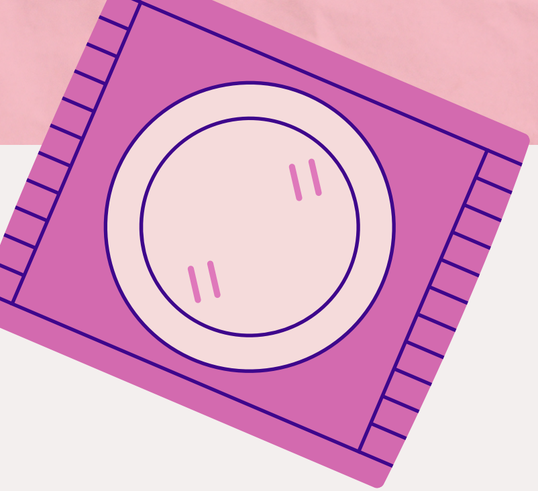


10 MILLION WOMEN ENROLLED IN US COLLEGES

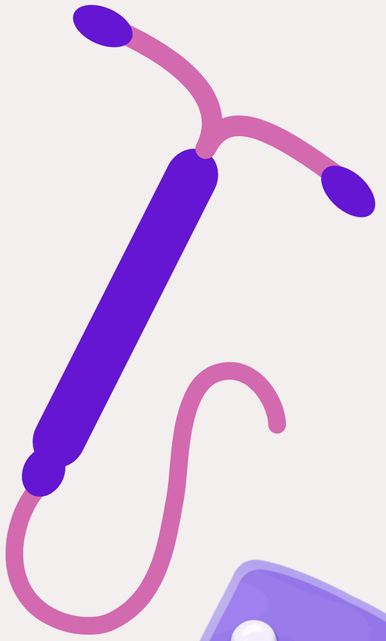
THE PROBLEM AT HAND

Many women take birth control alongside other medications including painkillers, antibiotics, supplements, and SSRIs not knowing they are putting themselves at risk of intensified health problems.

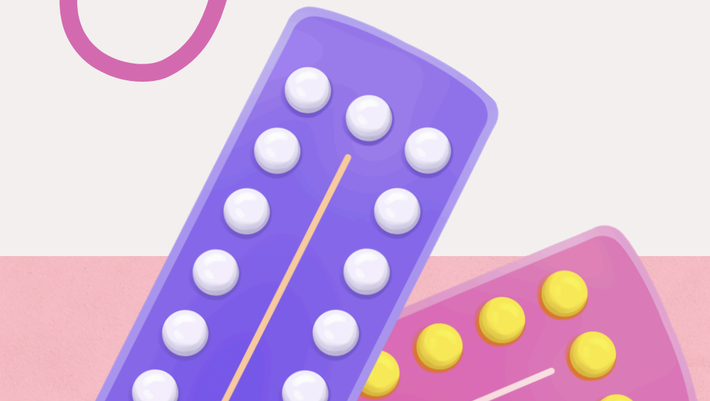
WE DIG UNDER SO YOU CAN FEEL CLEARER



WHAT IS DOWNUNDER



A website subscription that allows users to see which drugs negatively affect the body when being used alongside birth control, as well as helping users better understand their own menstrual health and how to minimize contraindications between birth control and other medicines.



USER EXPERIENCE & KEY METRICS

- Monthly subscription with initial free trial
- Monthly questionnaire
- Chance to leave website reviews

PROSPECTIVE PARTNER

- Our prospecting partnership: Planned Parenthood
- Similar values: Their target client is women seeking reproductive education and services
- Our value to them: Our tool brings awareness and help to college-aged women about what medications can create health/reproductive problems while they are on birth control, or if they plan on beginning.
